PACKING

Our Strong advice is that you get your remover to pack professionally for you, it may cost you a lot less than you thought and actually saves you money by cutting down on the risk of damage. However, if you decide to self pack, start as early as is practical. Have an area set aside where items that you are going to personally transport to your new home are kept, along with the cartons, bags and cases into which they will be put.

You must use strong cartons and proper packing materials. Ask your chosen remover to supply you with the professional packing materials the firm would use if they were packing for you.

China and Glass

Line the carton with shredded newspaper or equivalent and wrap pieces individually in tissue paper. Mark the box "Fragile" or "Very Fragile".

Books

For weight reasons, rule of thumb is no more than 30 to a carton.

Plates, Records and CDs

Stand on side, do not pack flat.

Toys

Ask the children what toys they want left out and don't pack them.

Washing Machine / Tumble Dryer

Ensure securing bolts are in the drum if you are moving long distance.

***** IT IS BETTER TO HAVE YOUR REMOVER PROFESSIONALLY PACK FOR YOU.**

A PACKING QUOTATION IS FREE.***
